**E: CoC Governing Process Chart**

HUD is moving toward providing greater definition and setting standards on the governing process of Continuums of Care. Check the box for each question below, and explain briefly if necessary.

	Yes	No
1. Does the CoC have a separate planning and decision-making body/entity that is broadly representative of the public and private homeless service sectors, including homeless client/consumer interests? If no, please explain.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Is the primary decision-making entity composed of at least 65 percent representation by the private sector (including consumer interests)? If no, please explain.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
3. Is the primary decision-making entity membership selected in an open and democratic process by the CoC membership? If no, please explain.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
4. Is there a Chair and Co-Chair representing both the private and public sector at the same time, with staggered 2-year terms and the Chair position rotating between the private and public sectors? If no, please explain.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
5. Has the CoC developed a Code of Conduct for the CoC decision-making entity and its Chair and Co-chair? If no, please explain.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
6. The Chair and Co-Chair and all members of the CoC decision-making entity may not participate in decisions concerning awards of grants or provision of financial benefits to such member or the organization that such member represents. Have they recused themselves from considering projects in which they have an interest? If no, please explain.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7. Does the CoC have a fiscal agent designated to receive funds from HUD?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

8. If your Continuum has not yet complied with **any** of the above broad standards for the CoC planning and decision-making process, please describe the extent to which your CoC will meet each guideline by the 2007 competition.
2. The Primary decision-making entity is the Iowa Council on Homelessness which was created by Executive Order #33 signed by Governor Vilsack in November of 2003. The Executive Order requires that 12 state agencies designate representatives to serve on the Council and that the Council expand the membership to include a broad representation from the private sector including consumers, advocates, providers, business and others. Currently there are 18 persons from the private sector serving with the 12 state agency representatives which results in 60% representation from the private sector. The Iowa Council is working to amend their bylaws to increase private sector membership to 23 which would give us the required 65% representation from the private sector by the 2007 competition.
4. Currently the Iowa Council has a Chair and Vice-Chair. For the past two years the Chair has been filled by a person from the private sector and his term ended in May of 2006. The Council elected a new Chair from the Public Sector as well as a Vice-Chair from the Private Sector for the next term. The Council is working to amend it's bylaws to insure that the Chair and Vice-Chair positions are filled from both the private and public sectors at the same time with staggered 2-year terms and the Chair position rotating between the private and pubic sectors by the 2007 competition.
7. Executive Order #33 designates the Iowa Finance Authority as the State's administering agency in developing and implementing the Executive Order. We interpret this designation to include the duties of fiscal agent.

## CoC Housing Inventory and Unmet Needs

### **I: CoC Housing Inventory Charts**

This section includes three housing inventory charts—for emergency shelter, transitional housing, and permanent housing. Note that the information in these charts should reflect a point-in-time count. For the Permanent Housing Inventory Chart, the beds listed under “new inventory” should indicate beds that became available for occupancy for the first time between February 1, 2005 and January 31, 2006. For complete instructions in filling out this section, see the Instructions section at the beginning of the application.

<b>(1) Check the primary method used to enumerate unsheltered homeless persons in the CoC:</b>	
<input checked="" type="checkbox"/>	<b>Public places count</b> – CoC conducted a point-in-time count <u>without</u> client interviews
<input type="checkbox"/>	<b>Public places count with interviews</b> – CoC conducted a point-in-time count and interviewed every unsheltered homeless person encountered during the public places count
<input type="checkbox"/>	<b>Sample of interviews</b> – CoC conducted a point-in-time count and interviewed a random sample of unsheltered persons
<input type="checkbox"/>	<b>Extrapolation</b> – CoC conducted a point-in-time count and the information gathered from a sample of interviews was extrapolated to total population of unsheltered homeless people counted
<input type="checkbox"/>	<b>Public places count using probability sampling</b> – High and low probabilities assigned to designated geographic areas based on the number of homeless people expected to be found in each area. The CoC selected a statistically valid sample of each type of area to enumerate on the night of the count and extrapolated results to estimate the entire homeless population.
<input type="checkbox"/>	<b>Service-based count</b> – Interviewed people using non-shelter services, such as soup kitchens and drop-in centers, and counted those that self-identified as unsheltered homeless persons

**Challenges and Barriers:** Briefly describe any significant challenges/barriers the CoC has experienced in:

1. **HMIS Implementation: Our HMIS implementation for the Balance of State Continuum continues to operate well and continues to mature. Our most significant implementation barrier was the loss of participation by 17 domestic violence programs as a result of the reauthorization of the Violence Against Women Act and the advocacy leading up to the final reauthorization. This loss reduced our family bed participation rate to 50% this year from our participation rate of 86% last year. Not only did the continuum lose significant data, but it has created an operational tension within the community of homeless service providers – pitting one type of service provider against another in the area of performance reporting requirements. We are also dealing with the impact of the loss of data and participation in relationship to our reporting for the next Annual Homeless Assessment Report (AHAR); January 1, 2006 – June 30, 2006. We have volunteered data to this report because we feel very strongly that rural homelessness needs to be well represented in the studies and the loss of this data will have a detrimental effect on the information we can provide for this state and region. Another challenge we are working with is the participation of street outreach programs. We have spent a significant amount of time developing a strategy to bring street outreach providers into our collection network on a jurisdiction by jurisdiction basis, but the time involved to bring all the partners together took longer than we anticipated and so we are not yet collecting data from the discipline of providers. We do however have a strategy in place to move forward in this area and we look forward to working through this plan over the coming year.**
2. **HMIS Data and Technical Standards Final Notice Requirements: The primary challenge for our implementation in regards to the standards has been the implementation of PKI (Public Key Infrastructure) within our network. Particularly in our network setting where we have a large state-wide implementation that covers three separate continua. This requirement is an extremely expensive element and one that was not planned for within our funding matrix. We have been working cooperatively with the HMIS Technical Assistance staff to network with other similarly sized implementations across the country to investigate solutions. One of our staff members has also been part of the PKI workgroup for the National Human Services Data Consortium. Currently, it appears our most viable solution may come through our HMIS software vendor. They are in the process of developing an aspect of the software that includes the functional requirements of PKI and could be installed through our existing network software.**

<p><b>Foster Care:</b> Iowa law mandates that the case permanency plan for children in foster care include a written transition plan of services for youth, 16 years and older and the establishment of local transition committees to address the transition needs of youth at the time they leave foster care. These committees act to address gaps existing in services or supports available that would assist the youth in the transition from foster care to adulthood. This protocol will make every effort to ensure that the transition will not result in the youth becoming homeless.</p>																
<p><b>Health Care:</b> The Iowa Council on Homelessness finalized a formal discharge policy and submitted it to the Governor in 2005. The proposed policy recommendations address discharge planning for a variety of populations at risk of becoming homeless, including those who are to be released from public-funded Medical and substance abuse treatment facilities and recommends that each state department be instructed to implement a discharge protocol based on guiding principals that would make every effort to insure that the discharge does not result in the person becoming homeless. The recommendations are now under consideration by the Governors office. We anticipate implementation of a formal protocol before the 2007 competition.</p>																
<p><b>Mental Health:</b> Mental health organizations are accredited by JCAHO (Joint Commission on the Accreditation of Health Care Organizations), as well as governed by state statutes for all aspects of mental health care in Iowa towns and counties. Those not involved with JCAHO are required to follow Iowa Code:</p> <table border="0"> <tr> <td>1. Mental Health</td> <td>Chapters</td> <td>229.3 and 229.16</td> </tr> <tr> <td>2. These standards are similar to the formal discharge policy submitted to the Governor in 2005. The proposed policy recommendations address discharge planning for a variety of populations at risk of becoming homeless, including those who are to be released from public-funded Mental Health facilities and recommends that each state department be instructed to implement a discharge protocol based on guiding principals that would make every effort to insure that the discharge does not result in the person becoming homeless. . ## P: CoC Coordination Chart

A CoC should regularly assess the local homeless system and identify shortcomings and unmet needs. One of the keys to improving a CoC is to use long-term strategic planning to establish specific goals and then implement short-term/medium-term action steps. Because of the complexity of the existing homeless system and the need to coordinate multiple funding sources, there are often multiple long-term strategic planning groups. It is imperative for CoCs to coordinate, as appropriate, with each of these existing strategic planning groups to meet the local CoC shortcomings and unmet needs. Answer each question in the checkbox provided, using an X to indicate Yes or No for each.

<b>Consolidated Plan Coordination</b>	<b>YES</b>	<b>NO</b>

c. Has the CoC or any of its projects received state funding as a result of its coordination with the State Policy Academy?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<b>Public Housing Agency Coordination</b>		
a. Do CoC members meet with CoC area PHAs to improve coordination with and access to mainstream housing resources?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<b>Coordination with State Education Agencies</b>		
a. Did the CoC provide the state education agency with a list of emergency and transitional housing facilities located within the CoC boundaries that serve families with school-age children or school-age unaccompanied youth under the age of 18?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

\*A State Policy Academy is a state-level process designed to help state and local policymakers improve access to mainstream services for people who are homeless. For more information about getting involved in a State Policy Academy, see <http://www.hrsa.gov/homeless>.

## W: CoC Housing Performance Chart

The following chart will assess your CoC's progress in reducing homelessness by helping clients move to and stabilize in permanent housing, access mainstream services and gain employment. Both housing and supportive services projects in your CoC will be examined. Provide information from the most recently submitted APR for the appropriate RENEWAL project(s) on your CoC Project Priorities Chart. **Note:** If you are not submitting any renewals in this year's competition for the applicable areas presented below, check the appropriate box in the chart.

<b>1. Participants in Permanent Housing</b>		
HUD will be assessing the percentage of all participants who remain in S+C or SHP permanent housing (PH) for more than six months. SHP projects include both SHP-PH and SHP-Safe Haven PH renewals. Complete the following chart utilizing data based on the <u>preceding operating year</u> from APR Question 12(a) and 12(b) for PH projects included on your CoC Priority Chart:		
<input type="checkbox"/>	No applicable PH renewals are on the CoC Project Priorities Chart	APR Data
<input checked="" type="checkbox"/>	<u>All</u> PH renewal projects with APRs submitted are included in calculating the responses below	
a.	Number of participants who <b>exited</b> PH project(s)—APR Question 12(a)	12
b.	Number of participants who did <b>not leave</b> the project(s)—APR Question 12(b)	48
c.	Number who <b>exited</b> after staying 7 months or longer in PH—APR Question 12(a)	3
d.	Number who did <b>not leave</b> after staying 7 months or longer in PH—APR question 12(b)	42
e.	Percentage of all participants in PH projects staying 7 months or longer (c. + d. divided by a. + b. multiplied by 100 = e.)	75%
<b>2. Participants in Transitional Housing (TH)</b>		
HUD will be assessing the percentage of all TH clients who moved to a permanent housing situation. TH projects include SHP-TH and SHP-Safe Haven/TH <i>not</i> identified as permanent housing. Complete the following chart utilizing data based on the <u>preceding operating year</u> from APR Question 14 for TH renewal projects included on your CoC Priorities Chart.		
<input type="checkbox"/>	No applicable TH renewals are on the CoC Project Priorities Chart	APR Data
<input checked="" type="checkbox"/>	<u>All</u> TH renewal projects with APRs submitted are included in calculating the responses below	
a.	Number of participants who exited TH project(s)—including unknown destination	553
b.	Number of participants who moved to PH	370
c.	Percent of participants in TH projects who moved to PH (b. divided by a. multiplied by 100 = c.)	67%
